# The Hamdan Bin Rashid Cancer Hospital Endowment

---

The Hamdan Bin Rashid Cancer Hospital Endowment honors the legacy of compassion and the lifelong commitment to healthcare and education of the late Sheikh Hamdan Bin Rashid Al Maktoum, by directing proceeds toward cancer research, treatment, and patient support programs.

Project Cost

**₹87M**

## Screening Department Dubai Hospital

The Screening Department advances preventive healthcare through the early detection of diseases, particularly cancer and chronic conditions. By delivering accessible, accurate, and timely screening services, it supports early intervention and contributes to better patient outcomes..

The department's key strengths include:

- Advanced diagnostic technologies
- Structured screening programs
- Proactive preventive care
- Accessible, community-focused services

Project Cost  
**₹28M**

Target to offer

**4.7M+** tests annually

## Gastroenterology (Ward 19) Rashid Hospital

---

The Gastroenterology Department provides specialized care for digestive system conditions. Using advanced screenings and diagnostic procedures, including endoscopy, colonoscopy, and imaging technologies, the department delivers timely, accurate care that supports quality outcomes for patients.

Project Cost  
**₹20.5M**

**1,213**

patients served in 2025

## Gastroenterology (Ward 20) Rashid Hospital

---

The Gastroenterology Department provides specialized care for digestive system conditions. Using advanced screenings and diagnostic procedures, including endoscopy, colonoscopy, and imaging technologies, the department delivers timely, accurate care that supports quality outcomes for patients.

Project Cost  
**₹25M**

**2,820**

patients served in 2025

## New Diabetes Center

Spanning more than 5000 square meter, twice the size of the current facility, the center will enable Dubai Health to serve double the number of patients over the next ten years. Strategically located for easy access from across Dubai, with the addition of specialties including cardiology, nephrology, and ophthalmology, it will offer patients a broad range of services and advanced therapeutic programs, elevating the comprehensive care experience.

Project Cost  
**₹70M**

## NICU (Ward 3) Latifa Hospital

---

The Neonatal Intensive Care Unit (NICU) provides specialized, life-saving care for premature and critically ill newborns who require advanced medical support in the earliest stages of life. Equipped with state-of-the-art technology and led by a specialized team, the unit monitors and treats complex conditions around the clock, ensuring safe, integrated, patient- and family-centered care.

Project Cost

**₹13M**

 **409**

patients served in 2025

## NICU (Ward 13) Latifa Hospital

---

The Neonatal Intensive Care Unit (NICU) provides specialized, life-saving care for premature and critically ill newborns who require advanced medical support in the earliest stages of life. Equipped with state-of-the-art technology and led by a specialized team, the unit monitors and treats complex conditions around the clock, ensuring safe, integrated, patient- and family-centered care.

Project Cost  
**₹15.8M**

**1,143**

patients served in 2025

## In Patient (Ward 8) Latifa Hospital

Inpatient Ward 8, dedicated to VIP patients, provides inpatient care in a private, comfortable, and personalized environment designed to respect privacy. The ward features spacious rooms and dedicated nursing and medical services tailored to each patient's needs, supporting quality care and patient comfort throughout their stay.

Project Cost

**₹17M**

**1,160**

patients served in 2025

## Operating Theatres (3 & 5) Latifa Hospital

---

Latifa Hospital's Operating Theatres provide an advanced surgical environment that supports specialized women's health care and are recognized as a Centre of Excellence in Gynecological Minimally Invasive Surgery (COEMIG). Operating Theatres 3 and 5 further enhance facility readiness while strengthening quality of care and the patient experience.

Project Cost

**₹12M**

**1,609**

patients served in 2025

## Cancer Research Lab

---

The Cancer Research Laboratory is a dedicated scientific facility advancing the understanding, prevention, and treatment of cancer through research and clinical studies. It plays a vital role in supporting precision medicine and bridging scientific discovery with clinical practice. The laboratory also focuses on translating scientific discoveries into therapeutic applications that drive progress in cancer care.

Project Cost

**₹35M**

## Animal House Lab

---

The Animal House Laboratory is a specialized research facility that supports biomedical research, including cancer research, within a controlled scientific environment that adheres to established ethical standards. Designed in line with best practices in animal welfare, hygiene, and biosafety, the facility provides controlled environments that enhance the accuracy of studies and the reliability of their outcomes. It also supports pre-clinical research and the development of therapeutic solutions, contributing to scientific progress and innovation in healthcare.

Project Cost

**₪8.5M**

## MRI Mobile Clinic

The MRI Mobile Clinic delivers advanced diagnostic imaging services that expand patient access to essential MRI scans across communities and remote locations. Combining operational flexibility with clinical excellence, it brings high-quality imaging closer to patients, with supporting early diagnosis, helps shorten waiting times, and broadens access to specialized imaging services.

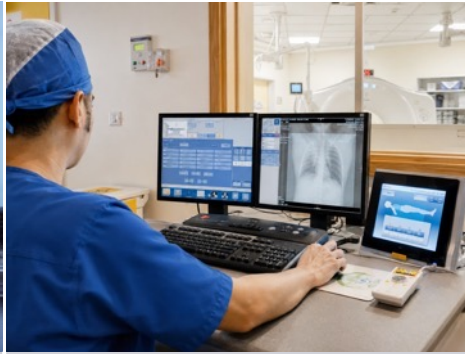

Project Cost

**₹9.5M**
